

A2500R RELEASE FILM

Economical High Elongation Release Film

DESCRIPTION:

A2500R is a red tinted, economical, high elongations, medium temperature release film with excellent conformability.

APPLICATION:

A2500R is an excellent release film for use on highly contoured parts for cure temperatures up to 285°F.

A2500R offers good release properties in the curing temperature range of most polyesters, vinyl esters, phenolic and some epoxies, as well as other applications where release films are required. The films color provides for easy identifications and removal from parts.

A2500R is available non-perforated or perforated.
