

TECHNICAL DATA SHEET

BR-2000
Stretchable Polyester Bleeder/Breather

DESCRIPTION:

BR-2000 is a stretchable non-woven polyester felt with drapeability enabling it to conform closely to the contours of your part. The multi-directional stretch, combined with a low density lightweight construction, makes **BR-2000** an economical bleeder/breather.

BR-2000 does not contain any binders which could close off air flow and stick to parts or other components. **BR-2000** will conduct air at 30 psi(3.5 bars).

APPLICATION:

BR-2000 is not a release fabric. When used in conjunction with uncured materials, we suggest that an interfacing ply of release materials be used against the detail being cured.

BR-2000 is non-toxic, non-corrosive, non-dusting and non-allergenic.

TECHNICAL DATA:

	TYPICAL VALUES	
Maximum Use Temperature:	400°F	205°C
Weight:	2.0 ± .2 oz/yd ²	75 ± 15 g/m ²

AVAILABILITY:

Dimensions, Standard: 60" x 150 yards/rl.

Custom Slitting also available
